SuperTextHub Demo Document

SuperTextHub public demo test

Project: Browser OCR audit

Task: Extract this text accurately.

Order ID: DEMO-1042

Total: USD 128.50

Soft-Wrapped Prose Sample

This page simulates ordinary body text that a PDF engine has wrapped across several lines. When you extract text from a PDF like this, every visual line usually becomes its own line in the output, which makes the paragraph hard to reuse.

A good cleanup tool should join these soft-wrapped lines back into one flowing paragraph while keeping the blank line that separates the two paragraphs intact. That is exactly what the Fix PDF line breaks mode is designed to verify.

Quarterly Field Audit

1. Prepare the source files

2. Run the browser OCR pass

3. Compare the cleaned output
